Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner of Patents and Trademarks

Office Action Summary	Application No. 08/959,748	Applicant(s) Clemmer et al
	Examiner Alton Pryor	Group Art Unit 1616

Responsive to communication(s) filed on Dec 15, 1998

This action is FINAL.

Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claims

Claim(s) 1-9, 19, and 20 is/are pending in the application.

Of the above, claim(s) _____ is/are withdrawn from consideration.

Claim(s) _____ is/are allowed.

Claim(s) 1-4, 6-9, and 19 is/are rejected.

Claim(s) 5 and 20 is/are objected to.

Claims _____ are subject to restriction or election requirement.

Application Papers

See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

The drawing(s) filed on _____ is/are objected to by the Examiner.

The proposed drawing correction, filed on _____ is approved disapproved.

The specification is objected to by the Examiner.

The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

All Some* None of the CERTIFIED copies of the priority documents have been

received.

received in Application No. (Series Code/Serial Number) _____.

received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____

Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Art Unit: 1616

First Action on the Merits

Action Summary

Claims 1-9,19,20 are pending. Claims 1-4,6-9,19 are rejected. Claims 5,20 are objected to.

Claim Rejection under 35 U.S.C. 102(e)

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1-4,6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Bonniface et al. (US 5,672,786). Bonniface teaches the process of the instant invention. Bonniface teaches a process for the production of difluoromethane comprising (a) contacting dichloromethane with hydrogen fluoride in the presence of a fluorination catalyst (metal of the oxide, metal fluoride or oxyfluoride) to produce a product stream comprising difluoromethane, monochloromonofluoromethane and unreacted starting materials (b) separating difluoromethane from the product stream from step (a) and c) recovering difluoromethane and recycling HCFC 31 to step (a) wherein sufficient hydrogen fluoride is employed in the process such that during step (b) the molar ratio of hydrogen fluoride to monochloromonofluoromethane is at least about 100:1. See claims 1-4,6-9.

Art Unit: 1616

Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9,19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,5-7 of U.S. Patent No. 5,763,708. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a process for producing difluoromethane comprising the vaporization of HF and dichloromethane to form difluoromethane in the presence of a fluorination catalyst as in claim 1.

Art Unit: 1616

In addition, the instantly claims HF:chlorofluoromethane ratio of 100:1 is within the range of range of said ratio defined by claims 5-7 in US Patent 5,763,708.

Claim Objection/Allowable Subject Matter

Claims 5,20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach a process for the production of CH₂F₂ (non-vapor production) comprising the molar ratio of HF to monochloromonofluoromethane from about 25:1 to about 75:1. In addition, the instant invention differs from US Patent 5,672,786 in that the instant invention discloses said process whereby distillation separates a top stream comprising CH₂F₂ and HCl and a bottom stream comprising HF, chlorofluoromethane, and unreacted CH₂Cl₂. In US Patent 5,672,786, distillation results in top stream comprising HF, chlorofluoromethane, and unreacted CH₂Cl₂ and bottom stream comprising CH₂F₂ and HF.

Telephonic Inquiries

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.

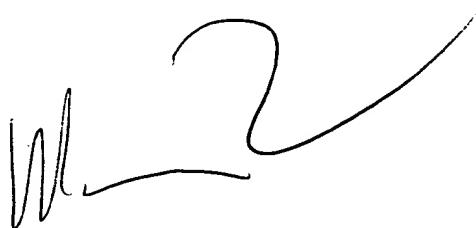

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees, can be reached on (703) 308-4628. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Art Unit: 1616

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
